EDUCATION

Barkatullah University Institute of Technology [BUIT] *Nov. 2020 – May 2024*

Bachelor of Technology in Information Technology Bhopal, Madhya Pradesh

EXPERIENCE

Code Clause

web development Intern July 2023 to Aug 2023

- I wield influence,guiding architecture,UI,and features—making pivotal decisions for the project's triumphant journey.
- Internship: honed real-time problem-solving, mastering team leadership and code craftsmanship.

code Soft

web development Intern Sep 2023 to Oct 2023

- Code Soft internship: honed hands-on skills in crafting user-centric web apps, mastering HTML, CSS, JavaScript.
- Crafted responsive websites, ensuring full flexibility—a testament to my impactful internship.
- Led the team, mastering team management and collaboration dynamics during my internship.

PROJECTS

Portfolio | *Next.js , Typescript , Redux , ReactEmail*

- My comprehensive portfolio, powered by Next.js, elegantly displays all of my relevant information.
- Using Next.js, I've crafted a portfolio that effectively presents all of my key details.

IMDB-clone | *React , Tailwind*

- Developed an IMDB clone featuring real-time updates on upcoming releases, popular movies, and top-rated films.
- Demonstrated web development and data integration expertise, essential for effective contributions to complex project.
- Designed IMDB clone's front-end for an enjoyable, seamless user experience, maximizing engagement and satisfaction.
- React project designed with Tailwind CSS for an enjoyable experience, offering fun-filled moments and entertainment.

React-Quize | *React , Tailwind*

- *Led Quizzy's Android system, using React.js, showcasing front-end skills and user-friendly interface.*
- Enhanced user engagement through intuitive UI/UX design, resulting in improved user experience for Quizzy's audience.
- Participate in a quiz platform—immerse yourself in timed knowledge challenges.

TECHNICAL SKILLS

Programming Languages:: Javascript/ Typescript, C++.
Frontend Technologies:: HTML, Css, Reactjs/Nextjs, Bootstrap/Tailwind , Vercel/Netlify.
Backend Technologies: : GraphQL, Nodejs, Express.js , Sanity.io.
Mern Stack Technologies: : MongoBg , React.js , Express.js , Node.js.
Developer Tools: : Linux/Window , Redux/Zustand, Git, Docker, Canva , Insomnia , Postman.

EXTRA- ACTIVITIES

- Led a workshop, training seven students in both front-end and back-end technologies with real-world projects.
- Dedicated to knowledge sharing, I contribute insightful technical blogs, fostering community learning.
- Teamed up with a friend to develop a Microsoft-based student attendance system with face recognition.
- Optimized an open-source project, submitting a pull request for a REST API in Postman Labs' GitHub.
- Engaged as a coordinator in school games, actively contributing to the event's smooth execution.
- Consistently aid friends facing project challenges, offering support and solutions to ensure success.
- Active hackathon participant, securing notable awards and gaining invaluable experience along the way.
